## 2-Year Program

### Optional Degrees:
- [ ] MPH
- [ ] MBA
- [ ] MS
- [x] Other: Harvard School of Public Health Summer Program in Clinical Effectiveness (PCE)
- [ ] None

### Number of Faculty:
- GYN Faculty: 2
- REI Faculty: 1
- GU Faculty: 1
- Colorectal Faculty: 1
- UROGYN Faculty: 1
- ONCOLOGY Faculty: None
- General Surgery Faculty: 1

### Residency Program Affiliation:
- [x] Yes
- [ ] No

### Computer Simulation Center:
- [x] Yes
- [ ] No

### Labs:
- [ ] Cadaver lab
- [ ] Animal Lab
- [ ] Dry Lab
- [ ] None

### Office Surgery:
- [x] Yes
- [ ] No

### Contract/Agreement Letter:
- [x] Yes
- [ ] No

### Salary:
- [x] Yes ($68,319, First Year Fellow, $71,715)
- [ ] No

### Benefit Package:
- [x] Yes
- [ ] No

### OB obligation:
- If yes, please describe obligation. 36 hours/month
- [ ] Yes
- [ ] No

### Junior Faculty:
- [x] Yes
- [ ] No

### Attending Privileges:
- [x] Yes
- [ ] No

### Moonlighting:
- [x] Yes
- [ ] No

### Non-compete clause:
- [ ] Yes
- [ ] No

### Malpractice:
- [x] Yes
- [ ] No

### Meeting support:
- [ ] Yes
- [ ] No

### Malpractice tail coverage:
- [x] Yes
- [ ] No

### Other coverage obligations—specify:
- Newton-Wellesley Hospital MIGS Unit call coverage

### Accept J1 & H1 Visa applicants:
- [x] Yes
- [ ] No

### Dedicated Research Hours:
- Yes

### Clinical Focus/Additional Training:
- [x] Reproductive Surgery
- [x] Hysteroscopy
- [x] Endometriosis/Pelvic Pain
- [x] Pelvic Reconstruction
- [x] Robotic Surgery
- [ ] Other:
Fellowship of Minimally Invasive Gynecologic Surgery
MIGS Center
Newton, Massachusetts

Accreditation Period: July 2014 – June 2018

FACULTY

KEITH B. ISAACSON, M.D.
Program Director
Associate Professor of Obstetrics, Gynecology and Reproductive Biology, Harvard Medical School
Director, Partners Center for Reproductive Medicine and Surgery, Newton-Wellesley Hospital, MIGS Center

STEPHANIE N. MORRIS, M.D.
Associate Fellowship Director
Associate Director, MIGS, Newton-Wellesley Hospital Clinical Instructor, Harvard Medical School

Fellowship Coordinator: Kathy Buckley, Tel: (617) 243-6709, Email: kbuckley2@partners.org

2-YEAR PROGRAM

Description: The fellowship program in Gynecologic Endoscopic Surgery is based primarily at Newton-Wellesley Hospital (NWH) where the fellow will participate in clinical, educational, and research activities related to advanced hysteroscopic and laparoscopic surgery. During the first year the fellow will operate with Drs. Isaacson and Morris (2 days a week) as well as with private practitioners at NWH. Additionally the fellow will spend at least one operating room day per week with Drs. Rosenblatt and DiSciullo, urogynecologists at Mount Auburn Hospital (MAH). The fellow will also see patients in the office (office procedures, new patients, pre and post op visits) with Drs. Isaacson and Morris one day a week. In the second year, the fellow will continue to operate with Drs Isaacson and Morris and will have rotations in GI surgery, general surgery and robotic surgery. They will also see office patients independently.

The first year fellow participates in the Program in Clinical Effectiveness (PCE), a joint program of Brigham and Women’s Hospital, Massachusetts General Hospital, Harvard Medical School & Harvard School of Public Health. The PCE is an intensive seven-week, 15-credit summer program, which contains summer-long courses in Clinical Epidemiology and Biostatistics.
The fellow will interact with PGY-3 residents from the Massachusetts General Hospital (MGH) and Brigham and Women's Hospital (BWH) Combined OB/GYN Residency Program and will have responsibility for teaching in the skills lab as well as in the operating room.

Clinical research opportunities are plentiful. There is ongoing research as well as fellow-initiated projects. The fellow will be involved in Center for Gynepathology Research at MIT, CIMIT (Center for Innovative Minimally Invasive Therapy), a conglomerate of Harvard Medical School (HMS), MGH, BWH, NWH, Massachusetts Institute of Technology (MIT), the federal government, and private industry, where there are several active ongoing research programs involving surgical simulation and education, prevention of medical errors, and development of the operating room of the future.

Overall, the goal of the fellowship is to cultivate leaders in minimally invasive gynecology: surgeons with expertise in advanced gynecologic endoscopy and interest in innovation, research, and education.
